PROFESSIONAL SUMMARY

AWS Certified Solutions Architect and Data Engineer with experience building serverless, event-driven pipelines, relational data models, and AI-integrated systems on AWS. Proficient in Python, SQL, and cloud-native tooling; M.S. in Information Systems Technology, GWU (2026).

EDUCATION

The George Washington University

M.S., Information Systems Technology. Graduate Certificate in Cloud Applications and Management; GW School of Business Fellowship Award.

May 2026

Covenant University

B.Sc., Computer Science.

May 2021

EXPERIENCE

Operations Assistant

Aug 2025 – May 2026

George Washington University, Charles E. Smith Center

- Delivered frontline technical support during large-scale live events, collaborating with cross-functional teams on time-critical execution.

Software Developer

Sep 2022 – Jun 2024

MBR Computer Consultant

- Translated client requirements into data-driven system designs, leading implementation in production environments.
- Built and deployed RESTful APIs and cloud-native microservices in Python on AWS, reducing system downtime by 30%.
- Coordinated cross-functional delivery teams, owning uptime, performance, and security across client environments.

Software Development Intern

Aug 2021 – Sep 2022

Lloydant Business Services

- Built backend services, API integrations, and database workflows supporting small-business automation and academic institutions.

PROJECTS

MandVision — Serverless Event-Driven Media Intelligence Platform

2026

<https://mandvision.vercel.app/>

- Engineered an event-driven AWS pipeline: S3 uploads flow through SQS-buffered Lambda into Rekognition image analysis and document extraction, with results indexed in DynamoDB behind Cognito-authenticated APIs; provisioned with AWS CDK.
- Delivered per-user analytics, label aggregation, activity trends, CSV export, and an OpenAI-powered assistant for querying documents.

Mandstacks — Cloud-Native Library Management System

2026

<https://dev.dp4bdvmab1flk.amplifyapp.com/>

- Built a serverless system (Next.js, Amplify, Cognito, API Gateway, Lambda, DynamoDB) with CDK-defined dev/prod environments, CloudWatch logging, X-Ray tracing, and automated smoke tests.

AI Delivery Readiness Tracker <https://ai-delivery-readiness-tracker-1.onrender.com/>

2025

- Built a full-stack app (Flask, JavaScript) that tracks delivery status, flags blockers, and scores risk severity, with OpenAI API integration generating weekly client-ready reports.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- AWS Certified AI Practitioner

SKILLS

Languages: Python, SQL, JavaScript/TypeScript, Bash, R

Cloud (AWS): Lambda, S3, SQS, DynamoDB, API Gateway, Cognito, IAM, CloudWatch, X-Ray, Amplify, EC2, RDS, CloudFormation, AWS CDK, Terraform (foundational)

Data Engineering: ETL design, event-driven pipelines, data transformation, relational data modeling, data quality validation, Pandas, NumPy, query optimization

Frameworks and Tools: React, Next.js, Flask, REST APIs, MySQL, PostgreSQL, GitHub Actions (CI/CD), Docker
