

MANDELA JUDE-OKEKE

Cloud & Data Engineer | AWS Certified Solutions Architect • Python • Serverless Data Pipelines

New Haven, CT (willing to relocate) | (202) 853-7552 | mandela.judeokeke@gwu.edu | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Cloud-focused Data Engineer and AWS Certified Solutions Architect with experience designing serverless analytics pipelines, relational data models, and ML-informed systems. Skilled in building cloud-native workflows with AWS, Python, and SQL to power data analytics and AI-driven applications, with production-style full-stack delivery experience. M.S. in Information Systems Technology, GWU (May 2026).

EDUCATION

M.S., Information Systems Technology (GPA 3.57) The George Washington University, School of Business	May 2026
Graduate Certificate, Cloud Applications & Management • GW School of Business Fellowship Award	
B.S., Computer Science Covenant University	May 2021

CERTIFICATIONS

AWS Certified Solutions Architect – Associate
AWS Certified AI Practitioner

TECHNICAL SKILLS

- **Languages:** Python, SQL, JavaScript/TypeScript, R, Bash
- **Frameworks:** React, Next.js, Node.js, REST APIs
- **Cloud (AWS):** Lambda, S3, EC2, RDS, DynamoDB, API Gateway, IAM, CloudWatch, CloudFormation; BigQuery (foundational); serverless architecture
- **Data Engineering:** ETL design, data transformation, relational data modeling, data quality validation, Pandas, NumPy, query optimization, KPI reporting
- **Databases & Tools:** MySQL, PostgreSQL, Git/GitHub, Postman, Excel (Power Query, PivotTables), AI-assisted development (Claude, ChatGPT)

RELEVANT PROJECTS

MandVision — AI Image & Document Intelligence Pipeline (Next.js, AWS, OpenAI) Live App GitHub	2026
• Built an end-to-end file-processing pipeline: uploads flow through Amazon Rekognition image labeling and document text extraction into a searchable, indexed library with per-user analytics, label aggregation, activity trends, filtering, and CSV export.	
• Integrated an OpenAI-powered assistant for querying processed documents (summaries, comparisons, entity search) with authentication and production deployment.	
AI Delivery Readiness Tracker — Full-Stack Web Application (React/Next.js) Live App	2026
• Built a production-style tracking application with authentication, full CRUD functionality, and an integrated AI copilot, using modern React patterns, state management, and REST APIs.	
• Designed a responsive UI and structured data layer supporting readiness scoring and progress analytics across delivery workstreams.	
SoundSync — ML-Driven Music & Events Recommendation Platform (AWS)	2025
• Designed and deployed a cloud-native recommendation platform integrating Spotify OAuth and Ticketmaster APIs; built ingestion and transformation workflows converting listening history and event metadata into analytics-ready formats.	
• Engineered Python ranking logic with feature-based filtering and deployed scalable AWS backend services handling asynchronous, API-driven data processing.	
GWLearn — AI-Powered Study Companion (Serverless Pipeline)	2024
• Implemented a serverless data pipeline (AWS Lambda, S3, external APIs) ingesting semi-structured content into relational-ready formats; engineered feature extraction supporting ML-driven summarization and recommendations.	
Serverless CRUD App on AWS — API Gateway, Lambda, DynamoDB, S3/CloudFront, Cognito Live Demo	2024
• Designed and deployed a fully serverless, authenticated CRUD application with least-privilege IAM policies, CORS handling, and repeatable deployments.	

PROFESSIONAL EXPERIENCE

Software Developer MBR Computer Consultant	Sep 2022 – Jun 2025
• Translated client operational requirements into data-driven system designs and workflows, leading implementation and adoption in production environments.	
• Built and deployed RESTful APIs and microservices in Python, reducing system downtime by 30% across hosted client environments.	
• Coordinated cross-functional delivery teams, owning uptime, performance, and security while maintaining documentation, testing, and version-control discipline.	
Software Development Intern Lloydant Business Services	Aug 2021 – Sep 2022
• Built backend services, API integrations, and database workflows for small-business automation and academic institutions; assisted in deployment and testing.	
Event & Program Operations Assistant George Washington University	Aug 2025 – May 2026
• Provide frontline technical support during large-scale live events, collaborating with cross-functional teams on seamless, time-critical execution.
